as originally published, provided that commetation may be paid a soldier traveling under orders on detached command, when it is impracticable to carry his rations, at the rate of one dollar a day, or less, as the secretary of war may direct. The secretary of war became satisfied that in the cases where commutation was necessary, the allowance dollar per day was not sufficient, and therefore, by general orders No. 104, of 1882, from this office, authorized the payment of one dollar and fifty cents per day as a maximum. It was not intended to authorize the payment of commutation in cases where it had not before been authorized, but the attention of the secretary has been called to such a large number of cases in which the increased commutation has been paid without justification, that it seems necessary to call the attention of commanding officers to the requirements

of the regulations. The searctary of war is advised that the increase in number of instances of The K. C., St. J. & C. B. it is found that the great majori y of commanding officers do not order commutation in similar cases.

It is thought advisable to indicate the general views of the department as to the proper construction of para-graph 2232 of the regulation by a general order, issued this day, and at the same time to provide for obtaining the views of department commanders on each case as it arises, so that so far as possible the views of command officers and of the accounting officer may be brought into harmony.
